

Hungry, Humble, Honest, with Heart.

About Us

Founded in 2009 and headquartered in San Jose, California, Nutanix is a passionate team of 7,000+ employees worldwide. Our people (we call ourselves “Nutants”) are the heartbeat of **#LifeAtNutanix** and one of the many things that makes Nutanix a great place to work at. We share an intellectual curiosity, a bias for action, and an obsession for our customers. We are builders and problem solvers with an entrepreneurial spirit. Above all, we celebrate what makes each of us unique.

We are humbled to be recognized as one of Bloomberg’s Top 50 Companies to Watch in 2020 and one of the **Fortune 100 Best Companies to Work For® 2020**. We’re growing fast and disrupting the computing industry. Join us and make your mark.

About Our Business

Nutanix is a global leader in cloud software and a pioneer in hyperconverged infrastructure solutions, making computing invisible anywhere. Companies around the world use Nutanix software to leverage a single platform to manage any app, at any location, at any scale for their private, hybrid, and multi-cloud environments.

Job Description: Systems Reliability Engineer (SRE) Intern

Location: Bangalore / Pune

We are ensuring the success of our groundbreaking technology through cluster health monitoring and quick response times. We are top-notch engineers with the ability to handle all problems that come our way. Working closely with Sales and Software Engineers, the SRE team acts as our customers' champions and has guaranteed that not a single box has been returned.

As a Systems Reliability Engineer (SRE) Intern, your responsibilities will include:

- **Providing world-class support** and being a champion for our customers.
- **Going above and beyond** to support customer business needs and usage of the Nutanix stack.
- **Troubleshooting, debugging, and diagnosing customer issues** encountered post-implementation.
- **Identifying the root cause** of problems and working towards permanent resolution.

- **Defining and leading changes to our product** with the Development/Engineering team based on feedback from customers and field implementations.
 - **Improving the serviceability of the product** by testing new features and developing tools to scale field deployment and auto-support infrastructure.
 - **Collaborating with various teams** (Engineering, Account, Product Management, etc.) to ensure timely resolution of customer issues.
 - **Developing and creating content** (internal and external knowledge bases).
 - **Working with technology partners** (e.g., VMware, Citrix, Microsoft) to resolve issues and push improvements in our ecosystem.
 - Provide support coverage during weekdays and off-hours on a rotational basis as necessary.
-

Requirements:

- Excellent **verbal/written communication** and **analytical skills**.
 - A strong sense of **customer centricity**.
 - **Passion and ability to learn** new things, with a drive to never be satisfied with the status quo.
 - **Willingness to work** in a fast-growing company with huge potential.
 - **Comprehensive understanding in Operating Systems, Networking, Hardware, Virtualization, Linux**.
-
